More power, more security, more comfort. The one of a kind, easy to use COMPIT unites multiple functions into one central, compact system: smartphone holder, Qi-certified +COM/UNIT for inductive smartphone charging with integrated NFC chip, as well as an additional front holder for a light or action camera. All of the functions you could wish for in one integrated holder.

Smartphone cases with special attachment hardware or a universal attachment can be ordered optionally. SKS GERMANY provides a free SKS MYBIKE APP, which offers many user-friendly features like a virtual cockpit, dealer locator and personalised cycling tracking.

On patrol with SKS GERMANY

Dutch police bikes equipped with SKS smartphone holders

While on patrol on bikes, the law enforcement officers in the Netherlands now use the COMPIT smartphone holder from SKS GERMANY. The COMPIT system impresses the police officers in Holland for several reasons: a mobile phone sits firmly and securely on the handlebars, even on rough terrain. The police officers also have a view of the display at all times thanks to the angle setting. Another advantage: the smartphone can be attached to the handlebars and removed just as quickly with a single twist.

The extraordinary order was awarded in cooperation with the bike manufacturer Santos, the supplier of police bikes to the Dutch law enforcement officers. The first bikes have already been equipped with the COMPIT system and handed over to the Dutch officials and additional bikes are in the pipeline.
